

HOME PAGE:

Create Account / Login:

- I. Admin Login
- II. Customer Login

- **Master Login** Note: Login description may pop up with (i) hover.
- **User name and password:** prompted by user when creating account and preferences. Consider auto creating username for customer :
 - First initial, Last Name, Area Code. – Example – MPOPE784

Master Login:

(Owner / Director login – able to access and edit all sections.
Input all vendor notifications etc.

Vendor Login – For independent hubs that would receive cargo to be shipped. Capable of doing local (individual warehouse based) notifications etc.

Associate Login - Warehouse / Office Workers – Login to start receiving shipments.

PLEASE NOTE THAT LINK FOR CUSTOMERS TO CREATE USER PROFILES, MUST COME FROM THAT VENDOR HUB.

It should be unique – allowing those customers to be assigned only to said hub – yet visible to the master.

It will allow for vendor operators to view progress, customer count, shipment volume and other important information.

Master Account Login

Create / Register Vendor HUBs in system.

Create / Register Local Offices in system.

- A. Can view & edit all sections – both admin and customers
- B. Once logged in, screen should see / be able to choose:
 - Master hub
 - Select Vendor hub,
 - Associates
 - Cargo – here you see the received cargo and its assignment to each hub. You can also see the country they are assigned to.
 - Shipments – this is tally, log and list of passed shipments.
- C. Must be able to send mass announcements / notices on Hub Closures, Holiday hours, Shipment updates / changes etc.

Once Logged in:

- DashBoard View

Vendor Account:

First Name*
Middle Name
Last Name*
Business Name*
Company Name* (as per registration)
HUB Name*
HUB Location* (address)
Email*
Mobile Number*
Phone / Hub Number
Date of Birth

MPJ LOGISTICS – Wireframe Outline - OP

Cycle Sections:

- **RECEIVING**
- **PACKING & CONSOLIDATING**
- **LOADING**
- **SHIPPING**

RECEIVING – 2 ways

1. Courier Drop off
2. Customer Drop Off

Courier Drop Off

Notes:

- Here, there is an option to **print** label. Label would include all inputted information, as well as additional information prefilled from the customer account preferences – including the default country and shipping method.
((Not sure we need to make this mandatory – discuss))
- Once code is assigned, system prompts use to assign its warehouse location.
- Assign shipment section in warehouse. Choose from options assigned by vendor.
– Ocean / Air

(Notes - location in this case would be where the box can be found / placed.)

Pre-assignments:

- Ocean Section
- Air Section
- Hold Section
- Specify Bin (open for manual fill notes).

SAVE

Customer receives email notification – example “Your shipment with tracking number ending in has been received at our SF warehouse. Stay connected for updates on shipment date”

Based on the information inserted, an estimated **freight** cost is automatically generated (not included in email).

Customer Drop Off

- Package Received
- Received in good condition? Select Click – Yes / No

- Weight & Dimension recorded. – system generates cuft / dimensional weight.
- Enter customer name – last or first name. System must auto-populate / bring up possible customer from customer base
-
- Insert date received, package weight, size (in units as required) sender / manual entry.
- Scan Tracking number Barcode
- System then requests package contents / description before you can move to next step.
- Once done, Package is assigned a number & QR code.
- Prepaid / freight collect? – option only available for customer drop off.
 - Here, there is an option to print label. Label would include all inputted information, as well as additional information prefilled from the customer account preferences – including the default country and shipping method.
- Once code is assigned, system prompts use to assign its warehouse location.
- Assign section in warehouse.

(notes - location in this case would be where the box can be found / placed.)

Pre-assignments:

- Ocean Section
- Air Section
- Hold Section
- Specify Bin (open for manual fill notes).

SAVE

Customer receives email notification – example “Your shipment with tracking number ending in has been received at our SF warehouse. Stay connected for updates on shipment date”

Based on the information inserted, an estimated **freight** cost is automatically generated.

PACKING & CONSOLIDATING

Next – customer has the option (selected in customer profile) if they are Basic – then nothing is required.

For consolidation clients:

- Open New Consolidation

- Select Customer Name / Account
- Select Container. Choose from:
 - Barrel
 - E Container
 - C Container
 - D Container
 - Box
 - FCL – 20ft Container
 - FCL – 40ft Container
- That selected container would be auto assigned a QR Code.

Load Container: fields to scan packages (previously assigned) is now available.

All scanned packages are now in assigned container.

Select:

- Close Container
- Add more items (providing that container is not filled or incomplete)

Once Closed, Select:

- Ship VIA
 - OCEAN
 - AIR

PRINT: Options

- Print Label will include predetermined info including shipper, sender and final destination.
- Print QR Code ONLY
- Generate manifest - this can be downloaded in XL
- SAVE

Next:

- Open New Consolidation

Please note that a container manifest must be able to be generated at any given time by user. (options available in menu)

Customer receives notification: Your package has been processed at warehouse and ready to be shipped out.

Please upload any relevant documentation for you shipment including invoices, declarations, etc.

LOADING

○

Used to recall which truck, date etc a completed container leaves the warehouse.

 - Enter tracking / warehouse receipt number
 - Save

Customer receives notification: Your shipment has been loaded **MOCKUP REQUIRED**

Note:

System should not let you move to a next SECTION, unless current mandatory fields are fully filled. Offer a “Cancel Entry” option.

SHIPMENT ARRIVAL

- Once container has arrived in island office, the container QR Code must be scanned. This will send an auto-notification to Customer & ALL HUBS that the master shipments has reached the destination.
- Each package is scanned by local vendor / office – confirming that shipment is now there.
 - There are fields to add additional information on
 - shipping charges
 - brokerage & other fees
 - import duties
 - delivery / transportation etc.
- Invoice Closed

Customer receives notification – Your shipment is ready for pickup at local office. Your invoice total is _____. Login to view entire invoice.

Please pickup at your earliest convenience to avoid storage fees.

Thank you for choosing (Office Name).
